

Please take action AGAINST Clear Channels abuse of the first amendment. Also please reverse your ruling about the number of stations a single company may own. Clear Channel is clearly monopolizing the radio market. They are using unfair business tactics and a compliant administration to gain carte blanche on how they run their empire. It is forcing competition out of business and the consumer is suffering. Clear Channels patent issue on live concert recordings is extremely shady. Since when can somebody patent "prior art"? This is highly dubious and is going to hurt bands that rely on allowing free concert taping and trading for a form of advertisement. Sincerely,
William LaFond
